

BAIPHIL cordially invites you to the Seminar on:

Know Your Cybersecurity Resiliency

Speaker:

Mr. Kama Neson Ganeson

Course Overview

Information is the currency of today's commerce, and businesses face the constant and growing threat of data breaches - intentional as well as inadvertent. Organizations face many challenges in the digital environment. Every day, your information systems face down thousands of cyber threats - spam, phishing, malware, hacking, and even brute force attacks. Your employees unwittingly open attachments with viruses, Trojan horses and other malicious software. Confidential customer information is disclosed through simple oversight or outright theft.

How an organization deals with the holistic process involved in the management of this data is crucial. It is also imperative that organizations have to be prepared to increase their cybersecurity investment to deal with newer and greater number of cyber threats.

Course Objectives

At the end of the training, participants are expected to:

- Understand the components, domains, risks and identification of controls around cybersecurity.
- Help their respective organizations implement robust cybersecurity framework.

Target Audience

- Quality, IT & Risk Auditors
- IT Database Admin
- IT Professionals
- Data Owners / Risk Champions

Course Outline

The Program is delivered using a combination of instructor-led lectures, case study and exercises on practical implementation of the concepts discussed within the training. The topics presented below define the areas of focus under the program:

Topic 1: Cybersecurity Overview

- Global Trends
- The World of Cyber

Topic 2: ISO 27032 – Guidelines for Cybersecurity

- Overview of Cybersecurity Guideline
- Interpretation of Clauses 5 to 10
